

## MEASURING PROCEDURES FOR CUSTOM VANITY MIRRORS

### EXAMPLE #1: Floating Vanity Mirrors

### FLOATING VANITY MEASUREMENT PROCEDURES

**1. Measure the "WIDTH" of the wall**

Measure the distance from the absolute left point of the backsplash to the absolute right point of the backsplash. If there is a no wall on either side, measure the distance from the wall to the outer edge of the backsplash. This provides the total wall width.

**TOTAL WALL WIDTH** \_\_\_\_\_

**2. Measure the "HEIGHT" of the wall**

Measure the distance from the top of the counter's backsplash to the very bottom of the vanity light. This provides the total height.

**TOTAL WALL HEIGHT** \_\_\_\_\_

### EXAMPLE #2: Wall-to-Wall Mirrors

### WALL-TO-WALL MEASUREMENT PROCEDURES

**1. Measure the "WIDTH" of the wall**

Measure the absolute distance from the left wall to the right wall. This provides the total wall width.

**TOTAL WALL WIDTH** \_\_\_\_\_

**2. Measure the "HEIGHT" of the wall**

Measure the distance from the top of the counter's backsplash to the very bottom of the vanity light. This provides the total height.

**TOTAL WALL HEIGHT** \_\_\_\_\_
